Full-stack developer with 4+ years of experience building scalable, accessible websites. Seeking software engineering roles where clean code and user experience are top priorities.

Work Experience

Full-Stack Developer, KPS3 - Reno, NV

Dec 2024 - Present

- Develop custom WordPress backends (PHP) integrated with HTML, CSS, and JavaScript frontends, emphasizing reusable components and a user-friendly visual editor for an enjoyable client experience.
- Analyze client requests, recommend optimized solutions, and deliver clear time and effort estimates.
- Outline technical project plans and break down tasks into actionable steps to align with deadlines.
- Collaborate with account managers to deliver website training to clients.
- Deliver continuous maintenance and issue resolution for client websites through long-term retainer support.

Frontend Developer, KPS3 - Reno, NV

Nov 2021 - Nov 2024

- Developed websites using modern JavaScript frameworks like React and Next.js, leveraging headless CMS platforms such as Sanity and Contentful for content management.
- Collaborated closely with designers and backend developers to build visually rich websites with a strong emphasis on accessibility and ADA compliance.
- Built scalable websites with an emphasis on reusable code and long-term maintainability.
- Participated in design reviews, offering feedback and alternative solutions to enhance user experience.
